## **V-And-E-Services Gaining Momentum**

**DENVER — April 1, 2002** — V-And-E-Services, one of the city's top virtual assistant services, today announced since its inception in October 2001, the Company has rapidly gained momentum by recently contracting with six new clients in a three-month time span (December 2001 to March 2002). "This quick growth in clientele clearly shows the need for virtual office support in the small business arena," said owner, Karen Reddick from her virtually-based home office.

In a time of corporate downsizing, the boom in self-employed businesses continues to grow rapidly. There are more than 9.9 million self-employed businesses in America. Of these, 85% conduct business over the Internet – or virtually. "Since 9/11, I truly believe we [as a nation] are going back to a simpler time," Ms. Reddick continued, "Going back to a self-employed, family-first environment will prove to be the wave of the future."

V-And-E-Services provides virtual assistance and office support for the small business, expanding business, entrepreneurs and hometrepreneurs on an as-needed basis, eliminating the need to hire full-time assistants. Clients do not pay for payroll costs, benefits, taxes, equipment or office space. – Let me take the weight off your shoulders.
